Cabinets

Steel or Aluminum cabinets any size, shape or depth

ESCO has been manufacturing quality sign cabinets since its inception in the mid-1960's. Whether you prefer steel or aluminum - including "wrapped" steel or aluminum - or an aluminum extrusion in a wide variety of depths, we have the knowledge and resources to produce:

- Single or double-faced signs
- Signs with a variety of face materials
- Custom Shapes
- Large or complex designs
- Aluminum extrusion including our own proprietary line with specialty features such as flex or rigid face attachments, hinged or retainerless (bleed) faces

We can accommodate most mounting and lighting requests. Mounting options include saddle, between pole, cantilever, thru-mount, or match plate.

Faces

Flat, pan, embossed poly, and flex with choice of vinyl, digital print or painted graphics

ESCO manufacturing can provide you with a wide variety of face materials and decoration options at competitive prices with industry-leading quality.

- Rigid, flat or formed
- Embossing, debossing and custom molds
- Routed aluminum
- Flexible faces

Polycarbonate faces can be cut to exact measurements for replacement faces or fit into a cabinet as part of a turnkey project.

ESCO's experienced team of artists take great pride in assuring your digital printing, vinyl or sprayed decoration will be perfect, with no patches, bubbles, blemishes or distortions.

Channel Letters

Unlimited selection of letter styles with LED illumination

ESCO takes great pride in producing high-quality channel letter displays. They can be created in a wide variety of formats, sizes, and designs. Along with the support of a knowledgeable sales staff, our team of craftspeople can fabricate your design concepts or specifications into a finished product that will turn heads. We offer all standard color LED illumination.

- Computerized and automated fabrication are used to produce a variety of styles, including standard, open faced & reverse letters
- Custom shapes for logos and symbols in sizes from 8 inches to 12 feet
- Letter sets or logos can be mounted individually, to a sign face, or on an extruded raceway
- Reverse (halo lit), front lit or front and back lit channel letters

Custom Fabrication

Custom shaped cabinets, pole covers, and sculptured decorative trims. Routed aluminum faces with push-thru dimensional letters.

Have you ever been presented with a sales opportunity that doesn't fall within the confines of typical sign cabinet construction? No need to let these profit opportunities pass you by. ESCO's custom fabrication capabilities are just a phone call away. Some of ESCO's capabilities include:

- Routed aluminum faces with push-thru dimensional letters
- Curved architectural end caps or sculptured decorative trim for cabinets
- Rounded pole covers, layered shrouds, and aluminum reveals
- "Shoe box" type faces for customers who specify no visible fasteners on the face
- Stucco and other textured paint finishes

ESCO's expert craftsmen can take your designs from concept to reality. By using our services you not only end up with a unique and creative sign, but you also added to your bottom line as well.

Knowledgeable, Professional Staff

Give us the opportunity to quote your next project.

Our skilled team of sales professionals, engineers, production, and office staff are looking forward to showing you how easy and profitable choosing ESCO as your outsourcing partner can be.
